Work Record

Appointments (current):

Since 2004 Professor of Economics, Institute for Economic Research on Innovation (IERI) Faculty of Economics and Finance, Tshwane University of Technology, South Africa.
Since 2007 Senior Research Fellow, Institute for Economic Research on Innovation (IERI), Faculty of Economic Sciences, Tshwane University of Technology. (I was the founder of IERI at the Technikon North-West in 2002. IERI became operational with the appointment of Rasigan Maharajh as Chief Director and its official launch by the Minister of Science and Technology in South Africa in 2004.)

* The spelling of my surname in my birth certificate in Malta is “Xerri” but my family adopted the spelling “Scerri” as the family name. This was allowed by Maltese law which saw “Scerri” and “Xerri” as interchangeable variations of the same surname. A change in Maltese law in 2012 required a strict adherence to the spelling of my surname as “Xerri” according to my birth record. Unofficially I still retain the spelling “Scerri” in the interest of continuity in my academic record.

- Since 2015 Professor Extraordinary at the Centre for Research on Evaluation, Science and Technology (CREST), Stellenbosch University, South Africa.

- 2001 From September 2000 to March 2001 I was co-opted by the Department of Arts, Culture, Science and Technology (DACST) to assist in the planning and the organisation of an international seminar on the measurement of innovation activities. The seminar was held in Pretoria on the 28/29 March 2001. This seminar was jointly organised by the Department of Arts, Culture, Science and Technology (DACST) and the Organisation for Economic Co-operation and Development (OECD) Directorate for Science and Technology Policy. To this end I was engaged to establish a team consisting of four graduate students and two staff members (an economist and a biotechnologist) to work on this project and to build research capacity in this area. Apart from the obvious implications for the measurement of technological innovation in South Africa, one of the main planned outputs of this project is a book on appropriate innovation measures for developing economies.
- 2001 Member of the DACST team attending the annual meeting of the National Experts on Science and Technology Indicators working party of the OECD in Rome.
- 2000 Evaluation of the Inter-Agency Agreement between the South African Department of Labour and the United States Department of Labour.

- 1996 **with Peter Karungu**, "The Impact of the Declining Rand on Inflation in South Africa", internal report submitted to the Central Statistical Services, Pretoria. Among other considerations the study involved collection of price indices (consumer and producer) with specific attention to the impact of inflation on various income categories.
- 1996 “An Assessment of *Strategic Objective 4: Economic Policy Capacity*”, USAID. The scope of this consultancy was to develop indicators relevant to capacity building within policy advisory bodies concerned with addressing problems of economic development and poverty within South Africa.
- 1996 “An Assessment of *Strategic Objective 5: Sustainability of Small, Medium and Micro Enterprises*”, USAID. The objective of this project was to ensure the financial and advisory support to SMMEs playing a significant role in the process of development in South Africa. The main thrust of the project was to ensure the initiation of a process of economic empowerment for previously marginalised population groups.
