<sup>1</sup>Nota bene: The use of this appellation is not an endorsement of the *racialised* categorisation nor designation. Rather, it reflects a historically determined nomenclature established by apartheid regime in the Republic of South Africa through the Population Registration Act No 30 of 1950 for the purposes of establishing and maintaining political segmentation, social segregation, and economic stratification. This *indignant* (sic) legislative instrument was repealed on the 28<sup>th</sup> of June 1991, prior to the advent of national democracy in 1994.

## Brief Biographical Note

Rasigan Maharajh is concurrently Nodal Head of the Department of Science and Technology and National Research Foundation' Centre of Excellence in Scientometrics and Science, Technology and Innovation Policy; the founding Chief Director of the Institute for Economic Research on Innovation at Tshwane University of Technology; an Associate Research Fellow of the Tellus Institute in Boston; and the Chairperson of the Southern Africa Node of the Millennium Project.

Rasigan was previously: Professor Extraordinary of the Centre for Research on Evaluation, Science and Technology at Stellenbosch University; Visiting Professor *at Rede de Pesquisa em Sistemas e Arranjos Produtivos e Inovativos Locais* in the *Instituto de Economia* of the Federal University of Rio de Janeiro, Brazil; Visiting Research Scholar at the George Perkins Marsh Institute of Clark University, USA; Head of Policy at the Council for Scientific and Industrial Research; and National Coordinator of the Science and Technology Policy Transition Project for South Africa's first democratic government. Before these deployments, Rasigan was: Senior Researcher at the Education Policy Unit of the University of Natal; National Coordinator and Researcher at Operation Upgrade of Southern Africa; Research Assistant at the Macro-Education Policy Unit of the University of Durban-Westville; Research Assistant at the Labour and Community Project of the South African Council for Higher Education; and a Casual Labourer at Pick and Pay Supermarkets. During the struggle against the apartheid regime, Rasigan held elected leadership positions within the: United Democratic Front, Congress of South African Trade Unions, and the African National Congress.

Rasigan was awarded a Doctor of Philosophy degree by the *Forskningspolitiska Institutet* (Research Policy Institute), School of Economics and Management, Lund University, Sweden; and he is also an alumnus of the University of KwaZulu-Natal of South Africa and the Harvard Business School of the United States. Rasigan is a Ministerial Representative on the Council of Rhodes University and an elected Senator of Tshwane University of Technology. Since 2004, Rasigan has contributed to more than 65 publications, and has presented his research in 42 countries.

### Work in Progress (2021)

Interim Steering Committee, Peoples Vaccine Campaign, C-19 Civil Society Coalition.
Task Team for National Research Foundation Research Impact Agenda.
Steering Committee for the Academy of Science of South Africa Forum on the Just Transition.

## Education and Training

### General Education and Training

1987: Reservoir Hills Secondary School (South Africa), **Matriculation**.

### Further Education and Training

1993 – Development Contact Network (DCN): **Logical Framework Matrix Methodology**: Participation sponsored by the European Commission.

1997 – 1998 – Global Business Network (GBN): **Basic and Advanced Scenario Development and Planning** Modules: Taught by Napier Collins, James Ogilvy, and Peter Swartz; Participation sponsored by Department of Arts, Culture, Science and Technology of South Africa.

1998 – Council for Scientific and Industrial Research: **Advanced Leadership Programme** *Certificate of Outstanding Merit*.

1999 – Think Tools AG: Basic, **Intermediate and Advance Methodology and Application** Modules: Taught by Albrecht von Müller; Participation sponsored by German Technical Cooperation (GTZ) and CSIR.

2004 – Cynefin Centre for Organisational Complexity: **Complexity Fundamentals** and Certification Course: Taught by Dave Snowden; Participation sponsored by IBM and CSIR.

### Higher Education and Training

1992: University of KwaZulu-Natal (South Africa), **Bachelor of Arts**, Majoring in Economic History and Sociology.

1993: Harvard University (United States of America): **Education Policy Analysis and Planning Certificate**, Harvard Institute for International Development, Kennedy School of Government.

1994: University of KwaZulu-Natal, (South Africa): **Bachelor of Arts (Honours)** Economic History, Dissertation Title: Conceptualising the Transition in South Africa: 1990 – 1994, Supervised by Bill Freund.

1999: Harvard University (United States of America): **Senior Executive Programme for Southern Africa**, Harvard Business School, [Alumnus Status].

2011: Lund University (Sweden): **Doctor of Philosophy**, Forskningspolitiska Institutet, School of Economics and Management; Dissertation Title: Innovating beyond Racial Capitalism: A Contribution towards the Analysis of the Political Economy of Post-Apartheid South Africa. Supervised by Claes Brundenius, Mats Benner and Mikael Klintman; Public Defence Chaired by Christer Gunnarsson; and Opponent: Luc Soete.

## Employment History

2004 - current	Chief Director	<b>Institute for Economic Research on Innovation (IERI),</b> Faculty of Economics and Finance, Tshwane University of Technology (TUT), RSA <i>IERI was launched by the Ministry of Science and Technology on the 11<sup>th</sup> of September 2004 and is a public-good research agency based within the largest public residential higher education institution in South Africa. IERI conducts scientific- and policy- orientated research within the disciplinary parameters of evolutionary political economy. IERI is also the hub of a network of experienced and engaged intellectuals, knowledge-brokers and research collectives specialising in matters relevant to Evolutionary Economics, Systems of Innovation, Science and Technology Studies, Research and Development Metrics, and Public Policy. IERI works along and across the Knowledge-Generation, -Diffusion and -Evaluation spectrum.</i>
2014 - current	Node Head	Department of Science and Technology and National Research Foundation' <b>Centre of Excellence in Scientometrics and Science, Technology and Innovation Policy (SciSTIP)</b> Management Committee, and Steering Committee <i>SciSTIP was launched on the 3<sup>rd</sup> of April 2014 and is a national CoE focusing on the sociology of science, science policy issues and knowledge production in higher education. Its work contributes to improved decision making in STI policy and consolidates the national information systems in science and technology in South Africa.</i>
2013 – current	Associate Research Fellow	<b>Tellus Institute,</b> Boston, Massachusetts, USA <i>Tellus was established in 1976 as an interdisciplinary not-for-profit research and policy organization. It conducted 3,500 projects throughout the world and became an international leader in resource and environmental strategies and in helping shape the then embryonic field of sustainable development. Tellus has worked at every geographic level – global, regional, national, local, and enterprise – bringing both vision and analytic rigor to fashioning strategies, policies, and decision-support tools. Its projects have been distinguished by an integrated perspective in order to illuminate the important linkages across spatial scales and among environmental, social, and economic dimensions of development. Key foci have included energy, water, sustainable communities, corporate social responsibility, and climate change.</i>
2014 - 2021	Professor Extraordinary	Centre for Research on Evaluation, Science and Technology (CREST), Faculty of Arts and Social Sciences, Stellenbosch University (SU), RSA. <i>CREST is an interdisciplinary research and academic centre established on the 1<sup>st</sup> of January 1995 and conducts research on the: nature of science and technology with specific focus on science policy issues in South Africa and on the African continent; nature and state of knowledge production in the higher education sector in South Africa and selected African universities; the methodology and sociology of science; and the nature of monitoring and evaluation studies.</i>
2014 – 2015	Visiting Professor	Rede de Pesquisa em Sistemas e Arranjos Produtivos e Inovativos Locais (RedeSist), Instituto de Economia (IE), Federal University of Rio de Janeiro (FURJ), Rio de Janeiro, Brazil <i>The Research Network on Systems and Local Innovative and Productive Arrangements is a network of interdisciplinary research established in 1997 at the Institute of Economics of the Federal University of Rio de Janeiro. It enjoins the participation of various universities and research institutes in Brazil, and maintains partnerships with other institutions in Latin America, Europe and Africa and Asia. The focus of the network is informed by changes associated with the transition from the Industrial Age to the Knowledge Age that impose the necessity of developing a new analytical framework that allows understanding the socio - techno-economic patterns emerging worldwide and their impact on competitiveness and developing countries like Brazil. As an alternative to the traditional focus on economic sectors and individual companies, RedeSist has been developing the concept and methodological approach focused on arrangements and local production and innovation systems.</i>
2014 – 2015	Visiting Scholar	George Perkins Marsh Institute, Clark University, Massachusetts, USA <i>The George Perkins Marsh Institute of Clark University has nearly a century of applied research experience. The Institute advances scientific understanding of the ways in which human's influence--and are influenced by--the surrounding natural, technological, and socioeconomic environments. Working within a collaborative agenda, the Institute coordinates resources from Clark University and elsewhere to study human transformation of the environment and responses to this change. Among the hallmarks of the Institute are collaborative research efforts that challenge traditional disciplinary boundaries in search of novel approaches and solutions, along with systems-based perspectives to wicked challenges such as climate change and human development.</i>

2002 – 2004	Corporate Group Head	CSIR Policy Group, Council for Scientific and Industrial Research (CSIR), RSA <i>The CSIR Policy Group formed the corporate core of an organisationally distributed research apparatus mainly conducting extremely sensitive policy support work, primarily for the Public Sector. It operated, as a virtual centre of excellence capable of constituting specialised teams' correspondent with programme specifications. As a preferred supplier of knowledge-intensive services, it performed the role of a broker across the different tiers and spheres of the public sector. The CSIR Policy Group networked effectively into the global, continental, and local domains of Science and Technology, Political Economy and Socio-economic Development.</i>
1999 – 2002	Centre Manger and Divisional Technology Investment Manager	Manufacturing Policy Centre, CSIR <i>The Manufacturing Policy Centre (MPC) was established in 1999 and was located in the Manufacturing and Materials Division of the CSIR. The aim of this group was to support the South African manufacturing sector to survive, grow and compete globally. The MPC offered its clients integrated policy development and strategy support, through its linkages with the organised institutions representing Capital, Labour and the State. The MPC concentrated on assisting government in developing policies while working with industrial sectors and labour in the interpretation and implementation of such policies. The Centre included Futures Research and Knowledge Management as programme areas. Besides overall responsibility for the Centre, being the Divisional Technology Manager required a competence in managing the allocation of investments from the Parliamentary Grant across the Division. In 1999/00, this represented the largest segment of public funding to the CSIR (ZAR 43 million). My specific responsibilities relate to securing this amount, establishing the process to determine its deployment, monitoring and evaluating the output and management of the Intellectual Property generated.</i>
1997 – 1999	Programme Manager	Policy Studies Unit, CSIR <i>The role of the Policy Studies Unit was to support and empower the organisation in striving for excellence in the field of innovation by providing intellectual inputs grounded in a thorough understanding of the local, regional, national, sub-regional and global context prevalent in a time-specific milieu. It achieved this through utilising the tools of action-orientated and scholarly research, to contribute towards the formulation of policy, which reflected the realities of South Africa, and thereby enhanced the abilities of the operational arms of the organisation to better contribute towards making their technology contribution towards growing the economy and reconstructing the society. It also developed the potential to achieve an income generating profile based on its strategic position. The primary outputs included direct interventions in the formulation of government policy and the provision of long-term planning resources to both internal (divisional) and external (Public and Private sector) clients. Primary clients include internally: Executive, Divisional Directors, Programme Managers, Project Leaders and Researchers; and externally: Civil Society, South African Government, the Private Sector, Parastatals and International Organisations.</i>
1995 – 1997	National Coordinator	Science and Technology Policy Transition Project, International Development Research Centre (IDRC) <i>The newly established Department of Arts, Culture, Science and Technology (DACST) was mandated to formulate a national science and technology policy for the democratic government of national unity in South Africa. The S&amp;TPTP was the vehicle established to coordinate and facilitate this process. The outcome of which was the White Paper on Science and Technology and associated legislation. This position was a secondment from IDRC to coordinate and facilitate the process. It also involved final authorship of the chapter on Human Resource Development.</i>
1995	Senior Researcher	Education Policy Unit (EPU), University of KwaZulu-Natal
1994 – 1995	National Coordinator	Adult Basic Education and Training Programmes, Operation Upgrade of Southern Africa (OUSA)
1993 – 1994	Network Coordinator	Adult Educator Development Project, OUSA
1993	Researcher	Adult and Vocational Education and Training Policy, OUSA
1992 – 1993	Research Assistant	Macro-Education Policy Unit (MEPU), University of KwaZulu-Natal
1991	Journalist	Youth and Student Political Desk, Africa Information Afrique
1988 – 1990	Organiser and Desktop Publisher	Labour and Community Resource Project (LACOM), South African Council for Higher Education (SACHED)
1988	Editor	Students Representative Council (SRC) Diary, University of KwaZulu-Natal
1985 – 1987	General Labourer (Casual)	Pick n Pay Supermarket, Pick n Pay Stores Limited
